Building GTM @AmPLY | NIT | N8N & Clay Expert | AI Automation
& GTM (n8n, Python, SQL) | Data Strategy | Boutique Consulting
| Venture Building | Multi-channel Orchestration Systems | Driving
Startup Growth through AI
Gurugram, Haryana, India

Summary

I am leading GTM at AmPLY (backed by Google) with foundation in Mechanical Engineering from NIT Srinagar . I specialize in dissecting complex problems and building efficient data-driven and automated solutions that deliver measurable business impact especially from Startup point of view. My engineering background provided me with a strong foundation in process optimization and systems thinking, which I now apply to automate workflows and analyze business data using AI. O- > Built an AI agent with n8n to automate lead enrichment, saving over 100 hours of manual work .O- > Developed a lead scraping pipeline that processed 10K+ records daily, contributing to a \$100K reduction in Customer Acquisition Cost (CAC).O- > Designed new onboarding workflows that improved user conversion by 20% .O- > Built BI dashboard in Looker Studio to analyze over 4,500 YC startups, driving strategic fitment analysis .SkillsAutomation & Development: n8n, Python, APIs, Workflow AutomationData Analysis & BI: SQL, Python (Pandas, NumPy), Tableau, Excel, Google SheetsBusiness Analysis: Requirement Gathering, Functional Testing, Process MappingI am actively seeking full-time opportunities in Automation, Data Analytics, or Business Analysis where I can apply my skills to drive growth and efficiency

Experience

AmPLY (backed by Google)
Founding GTM
September 2025 - Present (10 months)
Gurugram

- Built in house Multichannel AI Orchestration system (email, linkedin, WhatsApp) saving \$1000/month
- Mastered smartlead slack, Apollo, hubspot, n8n API integration & MCP

- Getting consistent 10-15 B2B meetings through non-voice channel
- Built revenue driven systems
- Built amply's website pixel perfect to figma design
- Helped in making website SEO, AEO effective from scratch

GrowthJockey

9 months

GTM Engineer

February 2025 - September 2025 (8 months)

Gurugram

- Designed and deployed a cost-efficient cold email infrastructure, including lead sourcing and automation, resulting in a 90% reduction in operational costs.
- Built a high-deliverability email system achieving 90–100% inbox placement, with a consistent 50% open rate and 1% reply rate.
- Contributed to the organization's Artificial intelligent automation strategy by training teams and laying the foundation for GenAI powered workflow systems.
- Independently developed an end-to-end WhatsApp messaging automation pipeline with deep analytics, hosted on a self-managed environment for full control and scalability.
- Engineered a WhatsApp Business API (WABA) messaging and nurturing pipeline, optimizing engagement while reducing per-message costs by 90%.

YL Associate

January 2025 - February 2025 (2 months)

Gurugram

- Collaborated with six departments at GrowthJockey to gain expertise in structural thinking, branding, and data visualization.
- Led Team Alpha to victory in the iBuild Hackathon by developing a blog automation software for SEO-optimized content.
- Developed skills in team building, charter creation, project management, and automation techniques for processes.

Ecoyaan

Growth Analyst

December 2024 - March 2025 (4 months)

- Designed and documented new automated seller onboarding workflows, directly resulting in a 20% improvement in seller conversion rates.

- Automated the management of seller onboarding data sheets by leveraging AI tools (GPT), which enhanced data accuracy and streamlined the entire integration process.

Varidus

Startup Advisor

November 2024 - March 2025 (5 months)

Singapore

- Conducted in-depth primary and secondary market research on Family Offices and Southeast Asia founders to generate qualified leads and support strategic decision-making.
- Collaborated in a 6-person team to deliver high-quality research on funding reports and market trends in Southeast Asia, presenting findings directly to senior leadership.
- Developed an interactive BI dashboard in Looker Studio to visualize and analyze data from over 4,500 YC-backed startups, identifying potential strategic partnerships.

Traway

Co-Founder, GTM

December 2022 - July 2024 (1 year 8 months)

Srinagar

Officially registered startup with company address as a hostel room. Analyzed historical booking data to optimize routes and vendor partnerships, an insight that was instrumental in scaling the business to \$1.7M in first-year revenue.

Mapped the end-to-end travel logistics process, identifying key inefficiencies and implementing standardized workflows that improved service delivery and customer satisfaction for over 2,000 unique customers.

Mapped the end-to-end travel logistics process, identifying key inefficiencies and implementing standardized workflows that improved service delivery and customer satisfaction for over 2,000 unique customers.

Indian Institute of Technology, Delhi

Robotics Project

December 2023 - February 2024 (3 months)

Hauz Khas

Conducted in-depth research on the design of an Autonomous Rover under Dr. Jitendra P. Khatait's mentorship.

Explored startup ecosystems in research and development parks, gaining insights into industry trends.

BoldBites Innovation Pvt. Ltd.

Co-founder, GTM

August 2023 - December 2023 (5 months)

At BoldBites Innovation Pvt. Ltd., I played a pivotal role in shaping operations strategy and managing business initiatives. By analyzing supply chain data, I identified inefficiencies and implemented processes that reduced food waste by 25%.

Collaborating with local hotels, we successfully provided over 5,000 high-quality meals to underserved communities, demonstrating our commitment to social impact.

Education

National Institute of Technology Srinagar

Bachelor's degree, ENGINEERING

A.S.N Hr. Sec. school

Physics, chemistry and mathematic majors

BSF Sr. Sec. School, Jammu

secondary 10th
